Introduction

Do you guys have any plan for the coming Easter holiday?

That's a good idea!

It seems we need to find a place with high chance of snow.

The Cursed Hill The Golden Tip Linsons Peak Pyggar Hillside The Raging Top

Year	Snowfall	Year	Snowfall	Year	Snowfall	Year	Snowfall	Year	Snowfall
2018	45	2018	...	2018	...	2018	...	2018	...
2017	58	2017	...	2017	...	2017	...	2017	...
2016	111	2016	...	2016	...	2016	...	2016	...
2015	155	2015	...	2015	...	2015	...	2015	...
2014	211	2014	...	2014	...	2014	...	2014	...
2013	255	2013	...	2013	...	2013	...	2013	...
2012	320	2012	...	2012	...	2012	...	2012	...
2011	...	2011	...	2011	...	2011	...	2011	...
...

I find 5 mountains, and the data of annual snowfall for each mountain in the past 19 years.

To see how these data are distributed, we should visualize them. Let's start from the first one, The Cursed Hill, and sort the snowfall value into 8 groups in an ascending order:

45 88 125 140 155 168 170 195 211 224 235 255 260 285 320 333 380

0 - 49 50 - 99 100 - 149 150 - 199 200 - 249 250 - 299 300 - 349 350 - 399
